TS 120D

## Drying cabinet TS 120D

*El-Björn is launching a new drying cabinet for schools and preschools which meets strict energy efficiency requirements.*

The new TS 120D is suitable for use in schools and preschools. It occupies less space than the standard TS 120A drying cabinet. Small outdoor clothes are easily and efficiently dried on hooks and a shoe shelf. The doors have self-closing hinges, and the cabinet cannot operate with the door open.

The TS 120D is a dehumidifying drying cabinet. This means that the air is controlled in a closed room, requiring a minimum of heat input and resulting in low energy consumption.

Using a dehumidifying drying cabinet prevents the problem of heated air being extracted from surrounding rooms and discharged outside. It also prevents the problem of humidity collecting in kitchens or bathrooms after being evacuated from the drying cabinet.

Various settings can be chosen for fast or economy operation, allowing further cost savings to be made.

The drying cabinet has a sound level of just 56 dB(A), one of the lowest on the market. A low-pressure cooling medium (R134a) is used that helps prolong the drying cabinet's lifespan.

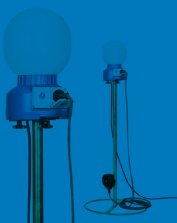

El-Björn drying cabinets have unique progressive, eco-friendly disposable filters which trap all dirt and debris.

This means that the humidifiers do not need to be cleaned inside. The filters need replacing twice a year, and replacement is very simple.

Installation and maintenance are quick and easy, and the cabinet has a detachable cover for easy access.

The cabinet comes with a detailed instruction manual.

The TS 120D can also be used in ordinary drying rooms.

EL-BJÖRN

## Produktfördelar:

- Suitable for use in schools and preschools
- New interior fittings for outdoor clothes, e.g. shoe shelf and hooks
- Low energy consumption
- Low sound level
- Eco-friendly disposable filters
- Fast drying time
- Auxiliary heating included
- Economical
- Long life
- Cannot be operated with the door open

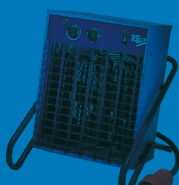

## Technical data, TS 120D

Height (total, cabinet + hood):	2050 mm
Height cabinet:	1650 mm
Height hood:	400 mm
Depth hood:	600 mm
Width:	1200 mm
Depth excl. door handle:	600 mm
Weight (total, cabinet + hood):	220 kg
Refrigerant:	R134a 900 g
Rated voltage:	3N~400V/50 Hz
Fuse:	10 A time delay
Size condensate tube:	Ø = 19mm
Sound level:	(compliant with SS-EN ISO 11202-1995) 56 dB(A)
Fast setting:	Drying time, energy consumption/kg 60 min., 0.28 kWh/kg
Economy setting:	Drying time, energy consumption/kg 90 min., 0.21 kWh/kg
Item No.:	E9200001
